

Product Name :
6 Axis Robotic Trainer

Product Code :
ENGLABINGCAG2300001

Description :

6 Axis Robotic Trainer

Technical Specification :

6 Axis Robotic Trainer

3 mm high quality stainless steel construction to keep it away from rusting.
6 degree of freedom robot arm with more untrammelled flexible experience.
Most parts are integrated punch-formed at one time, which is very strong and easy to install.
All movement joints are using high quality bearings with good precision.
Full 6 axis moving to do extra extension and support 180° robot servo.

6 Axis Robotic Trainer

Axis vertically articulated robot arm system designed as a cost effective solution for bench top automation.
500 mm reach 5/6 axis articulated format
Easy mounting of tools, grippers or sensors
Fully enclosed (wiring goes through the arm)
Optional incremental encoder watchdogs
Simple intuitive teach pad
Input/output interfacing
Non-volatile memory
User-friendly software
Complete with controller, software, on-screen manuals and cables.
