

Product Name :
Flexure Testing Machine Electrical Cum Hand Operated

Product Code :
ENGLABINGCAG360006

Description :

Flexure Testing Machine Electrical Cum Hand Operated

Technical Specification :

The Flexure Strength Testing Machines are designed to provide maximum rigidity throughout their working range.
The pressure gauge 0-100 kn x 1 kn, on/off switch and a slow/fast level to control rate of loading are fitted on the front panel of the pumping unit.
A micro switch and relay fitted inside the pressure gauge protects the unit from over loading.
A hand pumping unit, a separate electrically cum hand operated pumping unit housed in a cabinet is supplied.
A facility for hand operation is provided.
The load gauge is calibrated against NPL/ NCCBM certified proving ring.
