

**Product Name :**  
Hydraulic Jacks

**Product Code :**  
ENGLABINGCAG3600008

**Description :**

Hydraulic Jacks

**Technical Specification :**

Hydraulic Jacks have multipurpose utility of load carrying capacity application of loads while engaged in field investigation, determination of piles in the field, tensioning of wires in pre-stressed structures, loading of members of any structure for deformation characteristics etc.

Our jacks have piston travel of 50 mm and jacks up to 1000 kN capacity are provided with retraction springs.

Hydraulic jacks are supplied complete with manually operated pumping units fitted with bourdon tube type load gauge and high-pressure flexible hose pipe.
