

Product Name :
High Speed Stirrer

Product Code :
ENGLABINGCAG4000017

Description :

High Speed Stirrer

Technical Specification :

High Speed Mixer are used for varied mixing needs of Chemical, Pharmaceutical, Food, Dairy, Paints, Coatings, Pigments, Varnish, Adhesives industries.

Stirrer are provided in different capacities of motor speeds for various application with different types of blades used like saw tooth blade, impeller blade, propeller blade which are balanced to run at high speed.

For operation on 230V A.C. supplied with dispersion cup or baffle cup.

High speed stirrer is for mechanical analysis and also other laboratory applications for stirring Speed approximately 4000 R.P.M. under load and dispersion cup is supported on a rest on the stand of the stirrer and has a removable baffle.
