

Product Name :
Surface Soil Sampler

Product Code :
ENGLABINGCAG400036

Description :

Surface Soil Sampler

Technical Specification :

The apparatus consists of a 5 kg sliding weight drop hammer, which falls freely onto the driving head situated on top of the sampling tube ID 73x66 mm high.

Made from steel protected against corrosion.

Used to take a standard volume sample from the ground in order to establish the in-situ density of the soil.
