

Product Name :
Sand Density Cone Apparatus

Product Code :
ENGLABINGCAG4000038

Description :

Sand Density Cone Apparatus

Technical Specification :

The verification of the degree of compaction can be determined on site by a simple procedure consisting essentially in removing and weighing a part of compacted soil and replacing in the hole with sand by a simple apparatus recording the volume of sand and then calculating the density of the removed soil. The set includes the Double cone, two plastic sand jar and metal base plate except this model which is supplied with one acrylic sand container only.
