**Product Name:** 

Precision Laboratory Incubator

Product Code: ENGLABINGCAG4500018

## **Description:**

Precision Laboratory Incubator

## **Technical Specification:**

Precision High-Performance Incubators for sample protection and maximum usability

Precise Sterilization, Incubating and drying in one unit.

Better mineral or glasswool blanket insulation keeps the surface Instrument from being burnt.

Easy-to-use for digital interface and silicone gasket

Ideal large scale for labs culturing bacteria

3" fiberglass insulation temperature uniformity

Power surges built-in circuit breaker protects against

Internal electrical socket use of instrumentation within the incubator

**Technical Parameters:** 

Temperature Range: Ambient to 70 °C

Temperature Stability: Microprocessor Based PID Temperature +-1°C Controller +- 0.5°C Or better

Housing Material: CRC or Powder Coated Mild Steel Interior: Polish stainless steel 304 grade Sheet Insulation: Glasswool or Ceramic Blanket

Duty Cycle: Continuous

Optional: Double colour gate for the top panel request

Digital Setting: 0.1 °C Digital Resolution: 0.1 °C

Power Consumption: 220/230V Single Phase, AC +- 10% 50Hz and 3 phase 440V

Optional: Customer demand outer Stainless Steel 304 grade body Front Door: Glasswool or mineral wool with glass door window

Digital Setting: 0.1 °C
