

Product Name :
High Temperature Convection Oven

Product Code :
ENGLABINGCAG4500019

Description :

High Temperature Convection Oven

Technical Specification :

Precise hot Air Drying and Sterilization
Better Mineral / Glasswool / Blanket Insulation surface of the instruments from being Burnt
Kanthal super quality coil shaped heaters duly embedded better accuracy.
Unique Design of silent hot air blower, air Circulation provide temperature distribution and throughout uniform air movement
Stainless steel polish 304 grade interior resistant operation for different height.
Technical Parameters :
Housing Material: CRC or Powder Coated Mild Steel
Control Temperature: 100°C to 350°C.
Duty Cycle: Continuous
Insulation: High Temperature Ceramic Blanket
Temperature Range: Ambient to 100°C
Temperature Stability: $\pm 2^{\circ}\text{C}$
Power Consumption: 220/230V single phase, AC $\pm 10\%$ 50Hz, 440V 3 Phase for Temperature requirements

Engineering Lab Equipment India
