

Product Name :
Triple Beam Balance

Product Code :
ENGLABINGCAG4500048

Description :

Triple Beam Balance

Technical Specification :

Well-equipped to weigh solids, liquids, powders or even animals.
Effective magnetic damping of Triple-Beam Balances coupled with appropriate beam capacity reduces oscillation and speeds weighing process.
Comes with: stainless-steel pan, scoop, 6 in. dia. plate or plastic animal container.
Capacity is 2610g, when used with Weight Set.
High-speed throughput allows for more weighings in less time.
Beams are easy to read because of their high-contrast markings, while an end-reading device eliminates parallax.
Precision ground pivots and patented self-aligning agate bearings to ensure reproducibility.
Easy zero adjustment remains firmly in place, while deep-notched, tiered beams with diecast, center-reading poise ensure correct positioning.
Nonmagnetic stainless-steel bearing covers and rust-resistant weighing platforms.
Heavy zinc base for exceptional stability, a tamper-resistant poise removable from only one spot on the beam, and attachment weights with recessed pivots to keep them from slipping or falling.
