

Product Name :
Dial Thermometer

Product Code :
ENGLABINGCAG4500062

Description :

Dial Thermometer

Technical Specification :

Dial Thermometers work on principle of bi metal expansion.

Dial Thermometers consists of a sharp metal indicator which is fixed on a circular temperature scale.

There are two main components, one is a needle and another is a temperature sensor.

Scale or range of temperature which Dial Thermometers can measure may vary from -200 0 C to 650 0 Centigrade.

Few more types of Dial Thermometers are Liquid type, Gas filled and Va pour tension Dial Thermometers.
