

Product Name :
Heating Mantle

Product Code :
ENGLABINGCAG4500071

Description :

Heating Mantle

Technical Specification :

All Heating mantles are individually constructed and factory inspected for the highest electrical standards. Each heating element is incorporated in woven fiberglass yarn and fitted into a spun aluminium housing, powder coated.

Standard Heating Mantles are designed to take only one size of flask.

Various sizes are available to fit round bottom flasks of capacity 100 ml to 20 Litres.

The snug fit of the heating surface, which is in close contact with the flask, ensures good thermal efficiency.

All Heating mantles are supplied with built-in On-Off energy regulator.

Thermal Insulation: Ceramic Fibre

Energy controller: Built-in Simmerstat

Case construction: Aluminium Spun Body Powder coated

Max Temperature: Upto 450 Deg C

Mains Power: 220-240 V single Phase A/C
